Norman Blank
Alaska Dept. Fish and Game
Haines, Alaska

Dear Mr. Blank;

We, of Skagway, feel that the sport fishing potential of Lower Dewey Lake is not being realized. This lake is only a short walk from Skagway and is readily available to many people. However, not much interest is being generated in the fishing here because the brook trout from Dewey Lake that we have examined seem to be adult, spawning, dwarfs, and as a result of this heredity we feel that there is no hope for the situation improving itself.

We have a tram from the bottom of the hill to the lake and would be happy to assist the game dept. in any planting or improving program they choose to undertake.

If the choice were ours, we would like to see the lake planted with a strain of non-migratory rainbow trout.

Yours very truly,

Richard Brown
